

CIRCLE LMS FOR **HEALTHCARE**

DELIVER QUALITY CARE.

MINIMIZE RISK, MAXIMIZE COMPLIANCE.

The healthcare industry performs some of the most important work in the world. As a result, healthcare organizations are highly regulated and experience a great deal of risk. When dealing with the health and safety of thousands of patients, it is crucial that your organization stays current on the industry's latest compliance standards. Circle offers automated compliance management tools to ensure that your employees stay on top of their responsibilities and expectations at all times.

REDUCE TURNOVER, INCREASE RETENTION.

Insufficient staff and high turnover rates are some of the biggest issues in the healthcare industry today. To develop competency and ensure that your employees transition smoothly into their new roles, Circle helps you provide relevant training, promote communication between managers and new hires, and create an engaging training environment that encourages career development.

MAKE CONTINUOUS TRAINING EASY.

The healthcare industry's ever-changing health and safety regulations require your workers to renew their training periodically. Re-certification ensures that your organization will stay up-to-date at all times. With Circle, you can easily manage re-certification for your employees.

BOOST STAFF COMPETENCY.

Improving your staff's competency is critical in boosting retention and avoiding turnover. When your employees are confident in their roles, productivity will increase. Circle can help your new employees transition seamlessly into their new roles by offering insightful performance assessment features.

IMPROVE PATIENT SATISFACTION.

With capable and empowered employees comes happy and healthy patients. The health and happiness of your patients is your most valuable measure of success, after all. Circle helps you develop your staff's skills to deliver the best care possible to your patients.

Circle LMS supplies you with the tools to achieve excellence in the healthcare industry. Circle's integrated platform enables you to deliver efficient and personalized training, stay engaged in your trainees' progress, and maximize your healthcare institution's successful outcomes. Circle helps you develop your nurses, residents, physicians, and staff members into medical experts and deliver quality care to every patient.

PERSONALIZED TRAINING, AUTOMATICALLY

Your healthcare facility requires a large team with a variety of specialties. Circle is built to help you manage a large number of users with a diverse set of training needs. Circle utilizes assignment intelligence to automatically assign relevant training curriculum to users of all different roles, ensuring that your personnel will receive only the training that is necessary to them.

CUSTOMIZABLE TRAINING MATERIAL

Circle's course creation tool allows you to customize your educational content to fit a diverse set of training needs within your healthcare organization. You can upload photo, video, and audio material to your courses, create quiz assessments, and implement feedback to engage your learners and personalize their training experience.

EFFICIENT CLASSROOM COURSE MANAGEMENT

Personal, hands-on experience is instrumental in developing expertise in the medical world. With Circle, you can easily schedule and manage classroom courses to give your learners an immersive educational experience. Circle also employs an automated notification system to keep your trainees prepared. Classroom course management is easily accessed and integrated with the rest of your curriculum management tools.

SEAMLESS INTEGRATION

Circle is an open integration platform, enabling you to interface with a limitless number of external applications. You can easily upload external courses from virtually any source and collaborate with an unlimited number of external systems. Circle's open integration capabilities allow you to tailor your training programs to every different learner and create a highly personalized experience.
